Group NO. 24

SUSTAINABLE DEVELOPMENT GOALS (SDG) PROJECT MAPPING

Final Year Project

Project Title: Smart Research & Learning Assistant (**Axiom**)

Project Problem Statement: Students, teachers, and researchers often need to work with large amounts of academic and research material. Finding relevant information, understanding documents, preparing learning material, analyzing research papers, and performing academic tasks can be time-consuming. The proposed system provides role-based Student, Teacher, and Researcher workspaces and uses the existing document-processing and retrieval workflow to support academic learning, teaching, and research activities.

Sr. No.	Project Problem Statement	SDG No.	SDG Name	Justification / Contribution of the Project
1	Students, teachers, and researchers handle large amounts of academic content, making information retrieval and analysis time-consuming. Our system provides role-based workspaces and document-processing tools to support learning, teaching, and research.	SDG 4	Quality Education	The project promotes quality education by providing an AI-powered platform for students, teachers, and researchers. Students can learn from academic documents and study materials, teachers can create question papers, assignments, lesson plans, and feedback, while researchers can analyze papers, conduct literature reviews, identify research gaps, compare papers, and manage citations and data. Overall, the platform makes academic information more accessible and improves productivity in learning, teaching, and research.
2	Students, teachers, and researchers often struggle to manage and analyze large amounts of academic content. Our system provides role-based workspaces and document-processing tools to support efficient learning, teaching, and research.	SDG 9	Industry, Innovation and Infrastructure	The project promotes innovation in digital education by combining document processing, information retrieval, and AI-powered academic tools in role-based workspaces. It provides a modern and efficient way to access, organize, analyze, and use educational and research information, supporting improved learning, teaching, and research workflows.

Note: The selected SDGs are mapped only where there is a genuine and justifiable connection with the project's problem statement, proposed solution, and expected contribution.
